Overview

The Compatta space-saving staircase is assembled from a modular steel structure and solid wood treads and handrail. The treads feature a specially designed shape to help reduce the size of the staircase without compromising comfort or safety. Concealed fixings provide a clean and modern appearance.

The basic kit consists of 11 steps with balustrade and handrail to one-side, which can be customised to meet your specific requirements through utilisation of a wide range of accessories. The innovative Compatta staircase is supplied as an easy to install kit, complete with an installation manual and video.

Finishes

Solid wood	Walnut		Natural	
	Steel	White		Grey

Dimensions

The Compatta is sold in kits containing 11 treads, allowing for floor-to-floor heights between 2.2m and 2.85m. Additional treads can be ordered for floor-to-floor heights up to 3.57m.

Floor-to-floor height	No. of treads	Additional treads required (supplied separately)
2200 – 2640mm	10	-1
2410 – 2850mm	11	N/A (standard unit)
2610 – 3090mm	12	+1
2810 – 3330mm	13	+2
3010 – 3570mm	14	+3

Building Regulations

The Compatta alternating tread staircase has been designed to be compliant with all relevant standards. However, the adjustable nature of the staircase may allow the installer to complete the installation without adhering to UK building regulations Part K. A safety-riser kit (sold separately to the standard staircase kit) is required for compliance to the 100mm open riser regulation.

Responsibility for building regulations and health and safety regulations compliance lies solely with the customer and installer.
