

Ecophon Hygiene Protec™ A C3

Ecophon Hygiene Protec A C3 is a wall to wall, sound-absorbing ceiling system intended for environments where there are demands on low particle emission and where frequent wet cleaning and/or disinfection is required. This system is recommended where humidity levels are occasionally high. Examples of applications: the pharmaceutical and electronics industries, and in healthcare premises. The system is classified B1,B5 and B10 for zone 4 according to standard NF S 90-351 and clean room classified according ISO 5.

The system consists of Ecophon Hygiene Protec A tiles, which have a core of high density, 3rd generation glass wool and a painted particle-repellent Akutex™ HP surface. The

back and the edges are painted. The supporting structure is a corrosion protected exposed Connect T24 C3 grid of specially treated steel with a high corrosion resistance. The weight of the system is 3-4 kg/m². The tiles should be secured to the grid with Connect Hygiene clips in order to withstand pressure during cleaning and to minimise dirt traps.

THK mm	o.d.s. mm	NRC	SAA
20	200	0,90	0,89

Accessibility

The tiles are demountable. Minimum demounting depth according to installation diagram. The tiles are secured using Hygiene Clip 20 to allow for effective in-situ cleaning. The clips are easily removable from above the ceiling. A tightly sealed, easy-to-open Hygiene Inspection hatch is available to simplify access to the ceiling void.

Cleanability

Daily dusting and vacuum cleaning. Weekly wet wiping. Can withstand the use of common disinfecting chemicals. Withstand the use of hydrogen peroxide vapour.

Visual appearance

White 500, nearest NCS colour sample S 0500-N, 84% light reflectance.

Influence of climate

The tiles withstand a permanent ambient RH up to 95% at 30°C without sagging, warping or delaminating (ISO 4611). A higher temperature/moisture is permissible during washing as stated above. Microbiological growth class 0 according to ASTM G 21-96. Fulfills the requirements B1,B5 and B10 of zone 4 according to NF S90-351. The grid and accessories meet the demands of corrosion class C3 according to EN ISO 12944-2.

The glass wool core of the tiles is tested and classified as non-combustible according to EN ISO 1182. The systems are classified as fire protective covering according to NT FIRE 003.

Mechanical properties

See table about Max live load and Min load bearing capacity and Functional demands, Mechanical properties at www.ecophon.com.

Installation

Installed according to installation diagrams, installation guides and drawing aid. Cut panels must be sealed with Connect sealing tape using the Connect Tape applicator, or Connect Edge sealant. Penetrations must be sealed with a suitable sealant.

CE

The CE marking confirms important product performance such as sound absorption, emissions, fire safety and load bearing capacity. All Ecophon ceiling products are CE marked according to European standard EN13964, and individual product performance is declared in Declaration of Performance (DoP) documents.
