

THE  
HERITAGE  
COLLECTION

Bringing together the period elegance of three unique historical eras, the Heritage Collection presents a line of accessories with Victorian, Adam and Georgian detailing. Distinctive, flawlessly executed pattern work reflects each period: the Victorian range is characterised by a stepped edge; beaded edging reflects the Adam era; and a rope edge conveys the spirit of the Georgian age. The designs are made with solid brass or aluminium for a high-quality, low-profile finish that is the hallmark of Wandsworth. Each style is available in a choice of polished brass or hand-crafted antique finishes – bronze, copper, silver and brass – adding matchless grace and character to any interior.

Socket outlets

Socket outlets are based on the same modular principal as the matching grid switch system. They can be installed and aligned separately as the socket interiors are mounted on an adjustable grid within the box. Switched socket outlets have double insulated rockers. All units will fit metal boxes to BS4662 with a minimum depth of 35mm. Available in the range of finishes shown on page 83.

Switch/Modular interiors

Rocker switches are manufactured from brass, aluminium or plastic, finished to either complement or match the cover plates. Neons are available in red with white, black or red trim, or green with white or black trim. Key switches are white or black. Red interiors are available for special applications such as essential supply, etc. Alternative colour combinations can be supplied to order. Due to the grid mounting nature of the product range it is possible to mix any combination of plate finish with interior finish. It is recommended that samples are viewed before specifying. All switches are rated at 250V 20Amps except cat No. 15 & 17 which are rated at 6Amp.

\*Key switches are supplied with one key. \*\*For further information on Pulse wireless switch please see page 78.

Modular interiors outlets

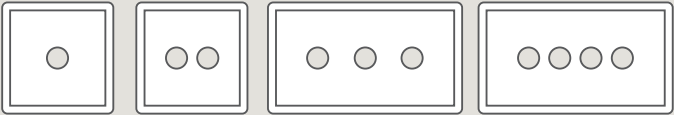

The range has been cleverly designed to allow bespoke outlet arrangement without the need for a specially designed custom unit. For example Data, Voice and AV outlets can be matched together using our existing grids and switch plates.

Toggle/Bell push

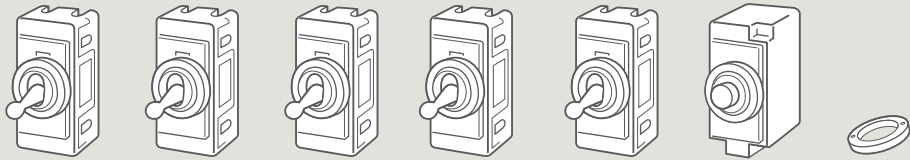

Flush cover plates are of aluminium, brass and have a 7mm overlap. They are 2.0mm thick with gently bevelled edges and rounded corners. Earthing of the front plate is by means of a scraping earth fitted to the adjustable grid. All have flying earth leads or terminal. Available in the range of finishes shown on page 83. See page 88 for box details.

\*Bell push rated at 4Amp.

Dimmers

Rotary dimmers, suitable for use with tungsten lighting are push on/push off switch dimmers which act at any pre-selected brightness setting. They have 2 way switching that may be used with a normal 2 way switch elsewhere.

Note: Single section plates should not exceed 500 watts tungsten dimming load. Twin section plates should not exceed 1000 watts tungsten dimming load. Failure to comply with this may result in overheating of dimmer modules. Note that transformers supplying low voltage lamps should be dimmable electronic transformers such as those manufactured by Mode.

Fused connection units & cable outlets

Fused connection units are grid mounted offering alignment and depth adjustment which enables the fused connector unit to be installed and the cover plate fixed after decoration work has been completed. The units have a retained fuse carrier that is not removed during fuse replacement. On switched versions, the double pole switch has 3mm contact gaps for isolation.
