Roller panel system 7300 offers a contemporary alternative to the classic curtain. Using flat fabric panels, intricate designs and textures are shown to their fullest extent. The system offers several methods of operation. Free unlinked panels provide shading where needed whilst still maintaining a visual aspect. Linked panels are used with electrical (in combination with G-Rail 6200), corded or draw-rod operation and can also be used as a room divider providing flexible accommodation. Discover the sophisticated versatility of the 7300-series!
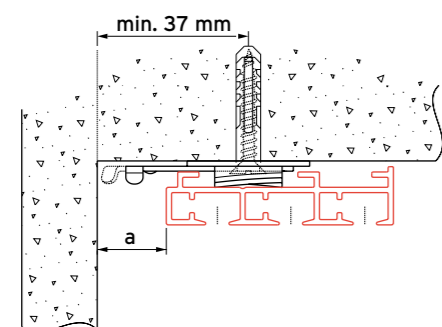

Standard colours: White RAL 9010, natural. Special colours on request.
