

## XX13001

Double action pivot set.

For emergency access to toilet cubicles.

- For emergency use in hospitals, nursing homes or wherever the ill or infirm run the risk of falling over and blocking an inward opening bathroom or toilet door
- Allows the door to swing in either direction. Specifically designed for use with the XX13006 emergency release door stop
- For doors up to 44mm thick
- Bottom bracket is frame mounted but must be floor supported when used on doors weighing in excess of 30kg
- Medium duty assembly for interior doors of average frequency traffic
- For doors weighing up to 80kg and up to 1100mm wide
- Top and bottom door plates have oil impregnated bronze bearings
