

SOLID SURFACE WASH TROUGHS

SOLID SURFACE PRODUCTS

Solid surface wash troughs are ideally suited for use in Schools, Universities, Nightclubs, Bars, Restaurant and Hotel washrooms where a modern, aesthetically pleasing appearance is desired.

ReZina Solid Surface Multiple Wash Unit - Product Codes 372 : 373

The Kurve multiple wash unit is delivered as a complete integrated hand washing solution for either two or three users incorporating both soap dispensing and temperature controlled water. Countertop, Basins and Sprayhead Shelf are constructed of Corterra cast polyester resin. The sprayhead is fabricated of heavy gauge type 304 stainless steel and includes vandal resistant flow control spray nozzles and integral soap dispensing system. Individual basin provided for each user includes grid strainer and waste fitting.

Sensor operation is supplied as standard. A hand operated, timed flow, option can be supplied. A TMV3 thermostatic is included. The enclosure assembly is fabricated from type 304 stainless steel polished to a satin finish. Standard colour is Smoky Granite Grey. Other colours can be supplied – please enquire.

372 ReZina Kurve K2

Two station unit sensor operation
Two station unit hand operation

373 ReZina Kurve K3

Three station unit sensor operation
Three station unit hand operation

Models 372 and 373 products are available to order. Please ask for current lead times.

The **ReZina** range of solid surface wash troughs is available in two versions.

Both versions are available as taplanding or splashback designs

- ◆ deck mounted (sit-on) design for fitting onto vanity unit type structures (provided by others)
- ◆ wall mounted.

All solid surface wash troughs are formed with a centre waste outlet and are supplied complete with a flush grated waste fitting.

The standard colour is arctic white although a wide range of other standard colours can be supplied as options.

All wall mounted models feature a 12 mm thick décor front fascia panel which can be supplied in a white compact laminate or from a matching or contrasting colour of solid surface material. A "no fascia" option is also available where the trough is supplied to accept a 12 mm thick panel provided by others, e.g. the panel could be a matching off cut of the WC cubicle system panelling.

ReZina range solid surface wash troughs are supplied as standard complete with either a sensor operated spout or a push operated timed flow tap per user. A "no tap" option can also be provided where customers wish to provide their own water outlet fittings.
