# Your guide to the perfect washroom

## PRODUCT CHOICE

### Decorative Panels for Washrooms

All 23 decors are available in high pressure laminate, compact grade laminate and moisture resistant MFC and are all FSC® certified.

Whilst having different performance characteristics, they still share the same surface colours and textures and can be combined on any washroom project, offering endless design possibilities.

**Decorative high-pressure laminate** of classification HGP/VGP to EN 438-3 with robust melamine resin surface and sanded reverse. HPL is a perfect, hygienic, easy care and hardwearing surface choice for washrooms that require flexibility in both profile and design.

 **Impact resistant**       **Moisture resistant**       **Hygienic surface**

 **Heat resistant**       **Ease of maintenance**       **Abrasion resistant**

The mark of responsible forestry

**Compact high-pressure laminate**, black core in the classification CGS to EN 438-4 with black core and decorative melamine resin surface on both sides. Waterproof and perfect for the wet conditions of toilet and shower cubicles.

 **Impact resistant**       **Moisture resistant**       **Hygienic surface**

 **Heat resistant**       **Ease of maintenance**       **Abrasion resistant**

The mark of responsible forestry

**Moisture resistant melamine faced chipboard**, Type P3, suitable for areas with higher demands on moisture resistance.

 **Moisture resistant**       **Hygienic surface**       **Ease of maintenance**

## COMPLETE FIXINGS

### IB5 Indicator Bolt

The IB5 Indicator Bolt utilises the DDA friendly slide action lock with a more sculpted shape. The oval housing and unique keep machined from a solid bar of aluminium produce a softer, more elegant look.

This lock features an easy to use, coin operated emergency release method. In an emergency simply use the edge of a coin to operate.

### CG Partition Support Leg

Manufactured from 32mm diameter solid aluminium extrusion, height adjustable to give a floor clearance between 125mm and 175mm, uneven floors are easily accommodated.

Hidden floor fixings and twin "T" Nut bolts clamp the panel securely to the leg, giving maximum rigidity and strength.

### Sprung Toilet Roll Holder F/Fix

Manufactured from aluminium extrusion, this strong frame can be face fixed or bolted through a panel to increase its rigidity. The frame is supplied with all necessary fixings.

A spring loaded plastic roller is supplied as part of the pack.

### HR3 CG 4 metre Headrail

Designed specifically to accommodate compact laminate panels between 12 & 13mm in thickness, the headrail wraps around the panels helping to align the fascias keeping them in the correct vertical alignment.

### Hat & Coat Hook

This screw fix hat & coat hook is fitted with a rubber buffer to prevent the door banging off the partition. It is fixed to the door using two countersunk screws on 17mm panels, or through fixed to the door on 12-13mm panels using a "T" Nut and screw.

### Outward Opening Keep

This is used to replace the standard keep (which can be discarded) when an outward opening door is required. The keep is fitted to the outside face of the fascia behind the overlap of the door in line with the indicator bolt. The keep is fixed with two countersunk screws (provided).

### Compact Grade Channel Bracket

When maximum strength is required, the use of compact laminate (usually of 12-13mm thickness) is nearly always specified. This bracket provides the perfect complement to the panel, offering simple style and strength.

### CG Hinge to suit 12-13mm

The H10 offers additional support by wrapping around the edge of the door. This helps to prevent the door from "bursting" under heavy impact.

**All fixtures are available in Black Powder Coated and Satin Anodised Aluminium**
