IXOS P Locker System

Providing a variety of choice in materials and décor, and incorporating an innovative plug-in construction, the system is the ideal solution for an extensive variety of projects. An array of configurations combined with custom manufacture and Kemmlit reliability provide peace of mind and ensure the ultimate finish.

Carcass Construction

4mm solid grade high pressure laminate sides and 8mm top and bottom. Flat or sloped top.

Door

8mm Toughened Safety Glass with ceramic silk screen print with sanded edges.

Flat satin anodised aluminium profiles.

Hinge

Option 1 - Full length satin anodised aluminium channel.
Option 2 - Stainless steel.

Dimensions – see details on page 7.

Timber Locker Systems

Combining high quality, carefully selected raw materials and leading design innovation, the Skirmett range of timber lockers is ideal for an extensive variety of installations. All products are supplied on a bespoke basis allowing individual design requirements to be met and exceeded.

Carcass

Manufactured to exacting standards and tolerances, the locker carcass is supplied in a factory assembled rigid format assuring durability and effortless installation.

Construction

18mm superior grade melamine faced particle board.
2mm PVC lipping to all edges (solid wood alternative available).
Glue & dowel factory assembled rigid construction.

Hinges

Blum high wear steel hinge.

Dimensions

All products are manufactured to order. See page 7 for size guides.

Leisure Locker

The exacting requirements of leisure centres, golf clubs, gyms or spas can be achieved with the Leisure Locker range, not only from performance but also through design. With both space considerations and design in mind, the "Z" locker option enables longer articles of clothing to be stored in conjunction with smaller items.

Community Locker

The provision of secure storage locations within public and municipal buildings is an area of product use that Skirmett have extensive experience. Whether storing rucksacks, text books, clothes or other belongings in schools, colleges, universities, sports facilities, or public buildings, items need to be secure, easily stored and easily accessible.

Mini Locker

To meet the need for secure locker space for smaller everyday items such as mobile phones, ipods, keys, etc, Skirmett have developed the Mini Locker to offer space saving, secure and robust storage space. Whether in large leisure complexes, fitness centres, or pool areas the system can be used in conjunction with the larger Leisure or Community Locker systems, or individually.

Doors

Locker doors are manufactured in a wide variety of options with regard to construction, material type and surface finish. Extensive wood effects, natural veneers and solid timber are available to ensure design requirements are met.

Door Option 1

18mm superior grade melamine faced particle board.
2mm PVC edging.

Door Option 2

18mm veneered faced particle board.
Rounded or solid wood edges.

Door Option 3

Solid wood including Oak, Cherry, Black Walnut, Mahogany and Ash.
Raised and fielded panel construction.
Variety of styles.

Benches

Manufactured to specific client specifications both from design and material selection, bench systems are provided to complement locker systems and complete the installation.

A wide selection of wood species are available, with a choice of construction types whether fixed to lockers or freestanding.

Coat hooks and rails can also be included within the design – again either wall fixed or as part of free standing bench systems.

Benches can also be offered in wood grain decors in solid grade laminate where environments maybe subject to water and moisture.

Locking Systems

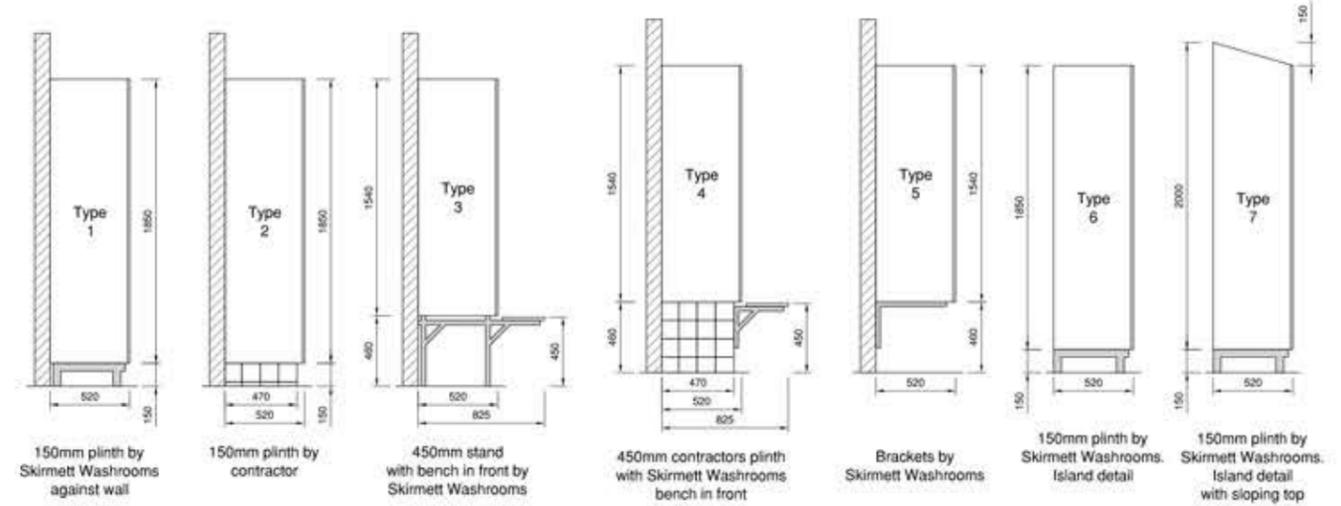

Solutions are provided for all installations with regard to locking systems and the essential need to secure belongings. Whatever the requirement, whether simple cam locks or more sophisticated electronic locking and card systems, the answer can be provided to ensure peace of mind.

Exterior & Interior Fittings

There are many options with regard to interior fittings to suit specific applications including rails, shelving, ventilation etc. Specifications vary between glass and timber types so please contact us for full details on 01491 638606.

Plinth Details

Supporting stands can have plinth infill panels on request. All locker constructions are available with either flat or sloping tops.

IXOS P Glass Doors

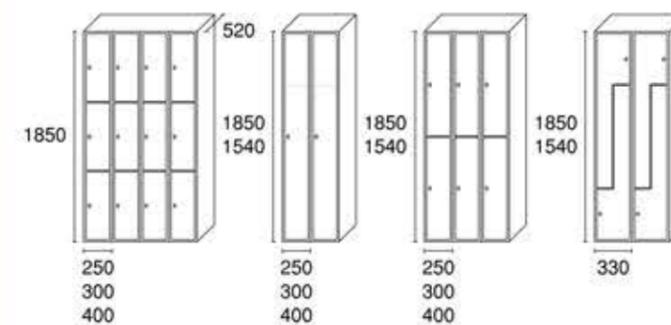

Timber Locker Doors

This represents a small selection as to the availability of wood species for both carcass and doors. Please contact us on 01491 638606 for your bespoke requirements.

Due to the limitations of the printing process, colours may vary slightly from those shown.

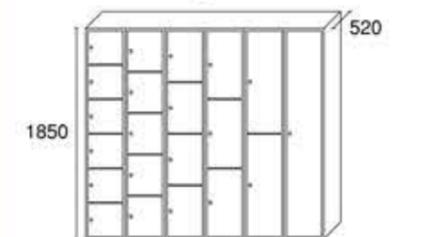

Leisure Lockers

Single unit up to 3 tier
Max carcass h/w/d = 2000/600/800mm
Space saving "Z" - lockers alternative

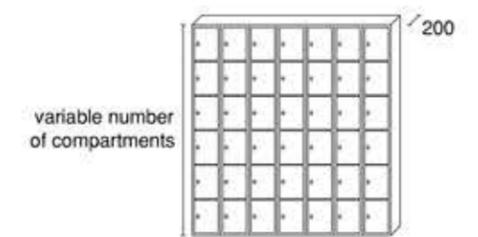

Please note that lockers can be made to individual requirements in both glass and timber, in all configurations.

Community Lockers

Max carcass h/w/d = 2000/600/800mm

Mini Lockers

Max carcass height 2000mm
Glass doors min h/w/d = 280/250/200mm
