

CEILING COLLECTION

CEILING COLLECTION

Woven Image have created design-driven, sustainable and easy-to-install acoustic ceiling solutions for use in commercial interior spaces, including workplace, education and hospitality environments. Delivering high acoustic performance, these ceiling systems control reverberated noise in shared spaces where noise levels can impact productivity and comfort.

All ceiling solutions carry third-party sustainability certifications. Baffles are made from EchoPanel® which achieves Global GreenTag™ certification (GreenRate Level A), with the maximum Product Health Declaration™ Platinum Health. They are Red List Free and have published ingredient transparency with Declare.

The acoustic performance of all ceiling solutions is tested and measured in accordance with global standards, ISO and ASTM. Also meeting the sound reducing requirements to secure points under WELL™ v2.

Contact your Woven Image representative for more information.

FUJI

Fuji is a range of decorative 3D formed ceiling tiles, inspired by modern Japonisme and art deco trends. Designed for use in varying combinations and configurations, either fixed or suspended from the ceiling, Fuji can be used as a feature, as well as large scale acoustic ceiling solution. Off-the-shelf lighting solutions can be easily integrated.

The manufacture of Fuji tiles considers the health of building occupants in its acoustic and environmental performance. The unique combination of form and material selection produces high sound absorption performance which brings acoustic comfort to commercial interior spaces.

Fuji achieves Global GreenTag™ certification (GreenRate Level A), with the maximum Product Health Declaration™ Platinum Health. They are Red List Free, Low VOC and have published ingredient transparency with Declare. Fuji is recognised by International Green Building Tools including WELL™, LEED®, GreenStar® and BREEAM®.

FUJI DESIGN & COLOUR PALETTE

Fuji is available in four different designs with varying sizes; Roku, Juni, Ku and Hachi. There are four stocked colours including cream, onyx and dual colour combinations of onyx-cream and cream-duck egg.

Fuji can be customised to any of Mura's colours (minimum quantities order apply).

560mm x 560mm x 90mm

FUJI ROKU is the smallest square tile of the range. It can easily be incorporated into beautiful custom configurations.

840mm x 840mm x 132mm

FUJI KU, as the larger square tile makes for an elegant suspended feature and functional ceiling solution.

560mm x 1160mm x 90mm

FUJI JUNI, rectangular in shape it offers more scope in sound control and pairs wonderfully with Roku.

1740mm x 840mm x 132mm

FUJI HACHI is a larger rectangular format, ideally suspended as a workstation or conference table feature.

ECHOPANEL® ARRAY

EchoPanel® Array is an acoustic ceiling baffle solution utilising 12mm (0.47") and 24mm (0.94") EchoPanel®, with streamlined hardware engineered for easy installation, and scalable for both small and large applications.

Woven Image have developed Array to require up to 60% less hardware compared to most other baffle solutions on the market. Array baffles can be directly fixed to ceilings or suspended. It is available to be used in both horizontal and vertical applications, allowing for a seamless finish from ceiling to wall.

All in-house baffle designs are inspired by our natural and built environment; from subtle linear shapes, to arcs and curves.

Choose from beautifully crafted baffles in the extensive EchoPanel® 12mm and 24mm colour palette (see page 15), or work with us to create your own unique designs (see page 20).

QUICK REFERENCE GUIDE

ECHOPANEL® ARRAY BAFFLE DESIGNS

EchoPanel® Array baffle and ceiling hardware dimensions will vary depending on project requirements. Exact quantities, measurements and drawings will be provided upon project specification.

Standard baffle designs are 2780mm in length and vary in depth, please see below:

200mm depth

300mm depth

200mm depth

300mm depth

300mm depth

BEAM is a minimalist profile designed for a refined and subtle interior. There is the option to choose from 200mm or 300mm nominal baffle depth.

WEDGE is robust, yet simple, giving a point of interest and detail that will compliment a tailored interior. There is the option to choose from 200mm or 300mm nominal baffle depth.

TAPER offers an elegant way to bring shape and dynamic elements to a ceiling project, whilst also incorporating an acoustic performance element.

CATHEDRAL is a celebration of rounded crescent shapes that create a decorative yet sophisticated design.

TURRET adds more compressed texture to a ceiling project with tighter and compact curves to work perfectly with various colours.

VALLEY creates to create an interplay between vertical elements and creates the opportunity for texture on an architectural scale.

VIADUCT is inspired by the architectural features of ancient Roman archways, these baffles make for a timeless statement ceiling.

WAVE can infuse spaces with various moods and characteristics reminiscent of ocean waves or desert sand dunes.

FLOW embraces a fluid motion, displaying gentle undulations of the tide.

CEILING HARDWARE

RAIL

2.5m long aluminium rail that holds Array baffles or Fuji barrel kits in place. In white or black powder coat.

SNAP COVERS

2.5m long aluminium profile, cut to size and snapped into the underside of Array rails to create spacing between Array baffles or Fuji barrel kits.

END CAPS

Screwed onto the end of a rail for a clean finish (Tek screws included).

Additional hardware:

SUSPENSION KIT

To suspend Array baffles, rails and Fuji tiles from ceiling.

JOINER PLATE

To connect multiple rail runs for larger ceiling applications (Tek screws included).

BARREL KIT

To connect Fuji tiles to ceiling or Array rail, available in; onyx/gold, off-white and onyx.

COMMERCIAL SERVICES

Woven Image's in-house Commercial Services Team is supporting architects and interior designers around the world to bring their clients' unique projects to life.

Managing queries and quotations, they provide advice, industry expertise and precise technical plans and drawings using CAD software.

Ideas turn into reality, using our vast range of beautiful finishes, or bespoke designs, shapes and colours to create truly unique spaces that align with specifications.

By liaising with designers, in-house operations and contractors, the Project Delivery Team ensure project materials are delivered on time, so that client projects are both accurate and beautiful.

ARRAY PRODUCT PERFORMANCE

ARRAY BAFFLE SOUND ABSORPTION

Tested in accordance with AS ISO 354: 2006 (R2016) and sound performance indices calculated in accordance with AS ISO 11654: 2002 (R2016), with NRC and SAA defined by ASTM C423 - 17. Testing is based on a 300mm spacing between each baffle. CSIRO test report number is AC283 - 01A - 1 and AC283 - 08A - 1.

Baffle dimensions mm	o.d.s* mm	Absorption area (m² Sabin)						Performance indices			
		125 Hz	250 Hz	500 Hz	1000 Hz	2000 Hz	4000 Hz	αw	Class	SAA	NRC
