s380 julio

# 01

Julio is a soft seating range comprising free standing and modular upholstered elements available in low-back and high-back options and can be arranged into a variety of configurations.

Designed for the office, hospitality, leisure and contract markets, Julio has a crisp geometric aesthetic which is accentuated by the chamfered arm detail.

The upholstery has been designed to provide a versatile seating system for architects and designers to create seating installations with extensive fabric combinations and colourways.

Designed by Jason Lansdale

## julio room

The julio room has been developed to reflect the trend for privacy seating within office spaces by adding an adjoining wall and acoustic canopy to the standard high back s380 julio sofa range.

A multifunctional furniture solution to create private space to relax or use with another sofa to form a meeting pod. The high-sided upholstery also provides sound dampening and a sense of enclosed space for team meetings or a temporary work base suitable for collaborative and touchdown areas.
