

AcornVac Vacuum Plumbing System

VACUUM: A FLEXIBLE & ECONOMIC ALTERNATIVE TO GRAVITY

- Saves time and money in new construction and remodeling costs
- Eliminates under-slab drain piping
- Provides unlimited flexibility in case arrangement

Below is a typical supermarket design showing the flexibility of using an overhead vacuum piping system. This design can include flows from case washdown, multiple defrost cycles and from other gray-water producing areas. Using the AcornVac vacuum plumbing system, substantial savings can be realized in material and labor costs.

Vacuum can be used with any supermarket case.

Dairy Cases

Meat Cases

Frozen Food Cases
