BEEM - 195 Body Variations

BEEM is available as a circular or square downlight with either a satin or polished reflector.

Dimensions & Variations

Dimension show both the circular and square versions

FUTURE

Please contact us if you require an alternative bezel colour as this may be accommodated.

Please note: As energy efficacy advances in LEDs are made and new bins become available, these are incorporated into the mixing chamber modules, offering continuously higher efficacies, without changing the dimensions, shape or lumen output of the system.
