

Ecophon Solo Rectangle M223

Installation diagram M223 Ecophon Solo Rectangle with support profile.

1. Solo Rectangle 2400 x 1200
2. Connect Support Profile
3. Connect Adjustable wire hanger
4. Connect Absorber Anchor cc 300
5. Connect Hanger clip

Minimum overall depth of system: 200 mm

This photo shows the main runner fixed to the top of a Solo panel.

There are only 4no wire hangers required compared to the standard installation (M281) with 6no hangers.

Note: Additional main runners can be installed on other Solo panels - Square, Circles etc.

Additional main runner can be installed between the support profiles to allow heavier loads above the 4.5kg maximum using 6no hangers.

This is an 8.3kg light fitting. The load is on the 600mm lengths of grid, which is transferred to the 1800mm main support profile.

Note: Panel is 11.5kg, light is 8.3kg. Total load on each hanger is 4.95kg.
