

Application example

Upstand headings can be achieved by using projection glider 6010. This glider can only be used on a straight track up to 6 metres long and with a maximum curtain weight of 8 kg.

Combination example

Combination example of 4200 and 5100 mounted on an adjustable extension bracket 4217-202. A wall return is created using corner connectors 4048-10 and 4048-08-ZO. G-Rail systems 7300 (panel track) and 7900 (roman blinds) can be placed instead of rail 4200.

Profiles 4200 and 5100 have the essence of a classic curtain pole combined with the precision and comfort of an aluminium curtain rail.

This becomes clear with the smooth and almost silent movement of the curtains. Both profiles are easy to bend and with the introduction of a small return allow the curtains to draw back to the wall to exclude day-light. To complement today's stylish interiors, profiles and components are available in a range of attractive standard colours.

Standard colours: White Ral 9010, natural, brown, gold, natural polished, gold polished. Special colours on request.
