

OUTSIDE ACCESS DEVICES

Strand Antipanic outside access devices

PH361

PH371

Description

- Optional outside access device (OAD) with level handle or knob available for use with modular and touch bar ranges.

Application

- Where outside access is required two threaded screws allow the centre mechanism of the device and outside access to be bolted securely together.
- Standard spindle suitable for doors up to 100mm thick.
- OAD comes complete with a standard 40mm half Euro cylinder as standard.
- In addition to the standard type of OAD a key retaining version is available (key can only be withdrawn in the locked position).
- Keyed alike and high security options available to order.

ES500

Description

- Outside access digital lock.

Finishes

Available in Satin Stainless Steel or Polished Brass finish.

Application

- Specifically adapted for use with Antipanic modular push bar, push pad and touch bar devices.
- Keypad side only supplied.
- Please order together with a PH109053M backplate.

PH381 Electronic Outside Access Device

- Device can be used with single, two or three point latches or bolts where electronic controlled access is required.
- Unit comes complete with key over-ride as standard.
- Can be connected to a variety of access entry systems to allow visitors to enter:
 - Digital keypad.
 - Proximity reader.
 - Swipe card.
 - Push button.
- A signal is sent to the unit allowing the visitor approximately 5 seconds to open the door (indicated by green LED) and then re-sets automatically to secure mode.

Finishes

Available in Satin Stainless Steel Plated, EPS Silver and Black finish.

PH392 Rim cylinder adapter plate

- Rim cylinder adapter plate for use with a rim cylinder for outside access.
- Only suitable for single point push pad and push bar panic latches.

* NB Strand Hardware do not supply rim cylinders
