

**PAINTABLE SOCKETS  
AND SWITCHES**

Paintable electrical accessories available in a range of flat plate designs

# The Paintable Ranges From Focus SB

**Match electrical accessories discreetly with any wall colour or finish.**

The Focus SB paintable ranges are premium quality flat plate designs that are supplied in a primed finish. The flat plates are painted to match the interior wall colour on site before being fitted to the wall.

Although predominately used to help make sockets more discreet we also supply primed switch plates for a complete matching look.

Interior designers often use paintable ranges with other Focus SB switch plate designs such as Prism, see p.7 for examples.

Specify the best combination of options below to suit your interior.

**SWITCH FINISHES:**

- White
- \* Black
- \* Polished Nickel
- \* Satin Nickel
- \* Polished Chrome
- Satin Chrome
- Bronze
- Polished Brass
- \* Satin Brass
- Antique Brass (rocker only)
- Antique Silver

**INTERIOR COLOURS:**

- White
- Black

**PLEASE NOTE:**  
These ranges require at least 35mm metal back boxes when installing, and are secondary fix.

## Paintable Socket Plates

Minimise the visual impact of the multitude of power outlets required in modern homes.

Focus SB can also supply bespoke plates manufactured to include any combination of outlets, in custom plate sizes, and supplied in the paintable primed finish.

## Paintable Switch Plates

Choose from rocker or dolly switches in a wide range of finishes to match contemporary or more traditional interiors.

The precision guillotined edges of the True Edge plate offers the cleanest and sharpest of finishes. This unique manufacturing process keeps the edges very crisp and the corners as sharp as possible.

FEATURES:

- Flat plate
- Guillotined edges
  - the sharpest available finish
- High quality interiors
- Secondary fix
- Counter sunk hex head screws
