WELCOME TO A WORLD OF LIGHT

Lighting is a powerful and versatile tool that can bring your home to life. A good lighting scheme will enhance your interior and create real atmosphere. Once you know what it can do, the possibilities are endless; use it to add drama, or create a feeling of relaxation; to brighten a work space, or spotlight a precious object. It literally transforms a space.

More than any other tool, light is intangible and hard to get right, which is why I developed our London showroom to demonstrate the power of light.

John Cullen was founded in 1981, and now works on projects all over the world – from contemporary houses to period properties, hotels and even yachts. We're proud that our lights are designed in-house and that we support British manufacturing, and we passionately believe that energy efficiency should complement great design.

Whether you want to buy a single fitting or to commission an entire lighting scheme, our designers and sales team will help you find the best solution.

Many Thanks

A stylized, handwritten signature in black ink that reads "Sally". The signature is fluid and cursive, with a large loop at the beginning and a long, sweeping tail.

Sally Storey | **Design Director**

DESIGN SERVICE

At John Cullen we offer a bespoke design service to ensure that you have the right lighting for the right task. We'll help you with a scheme that will bring out the key features of your home or garden, and make each space come to life.

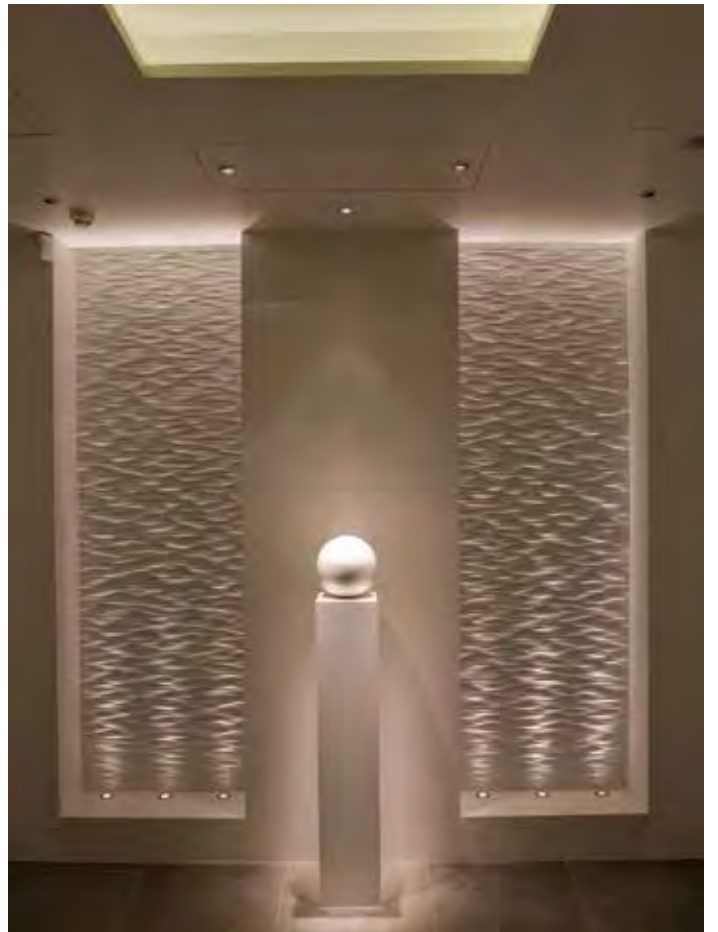

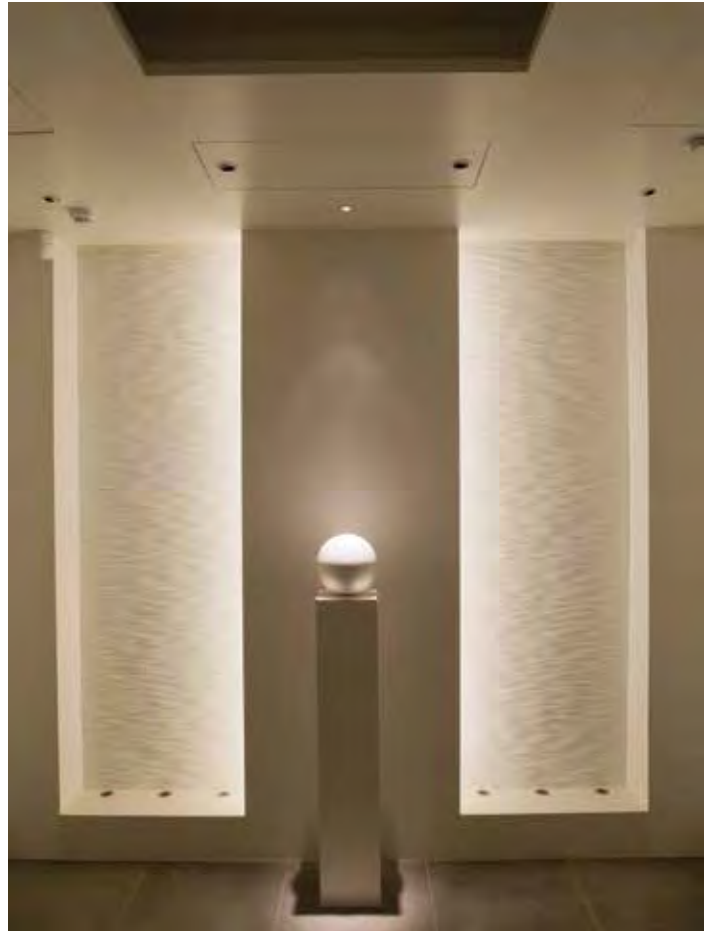

Lighting should never be an afterthought. It needs to be considered right from the start, with plans completed before the first electrical fix.

With help from our designers, we can create the right lighting solution that will show off everything from furniture to fabrics, artwork to architraves. We will talk you through the endless possibilities to create a tailor-made scheme that delivers the wow factor.

Our team of designers can either meet you on site, or you can visit our London design studio for a detailed discussion.

We work on an hourly basis or we can prepare a proposal for visits around the UK and abroad.

SHOWROOM DEMONSTRATIONS, MASTERCLASSES & CPDS

We offer demonstrations and masterclasses to help and inspire you. Visit our state-of-the-art showroom to be amazed by the latest in energy-efficient solutions and discover how much your home can benefit from a creative lighting scheme.

Stunning effects are displayed in specially designed sets for the kitchen, dining room, bedroom, bathroom and sitting room, depending on which room you are looking to light.

Our full black-out facilities enable you to see the power of light and how it can transform a space at the touch of a button, whether it's for an object, a room or the whole house and garden.

Our masterclasses, run by design director Sally Storey, are ideal for anyone wanting inspiration or needing advice, and we also offer a range of BIID and RIBA accredited CPDs for interior designers and architects, as well as specific classes in exterior lighting.

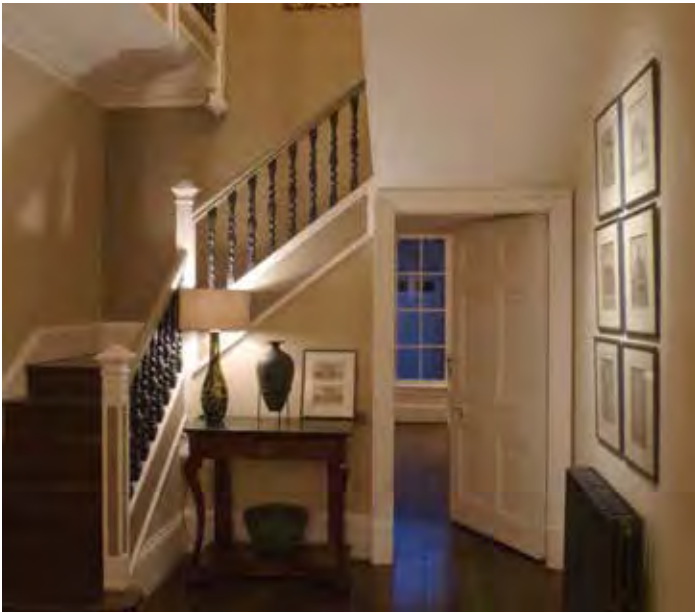

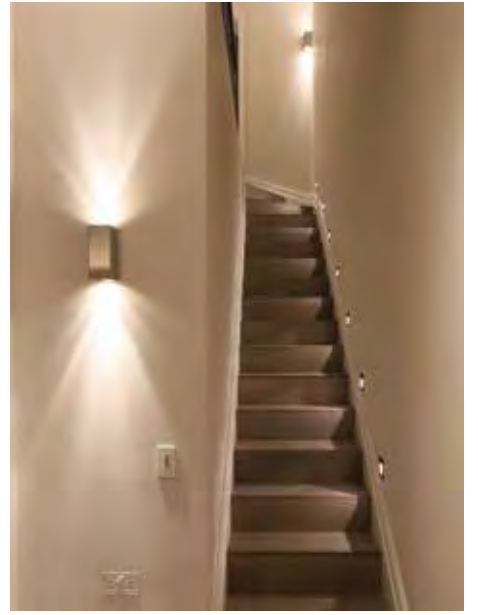

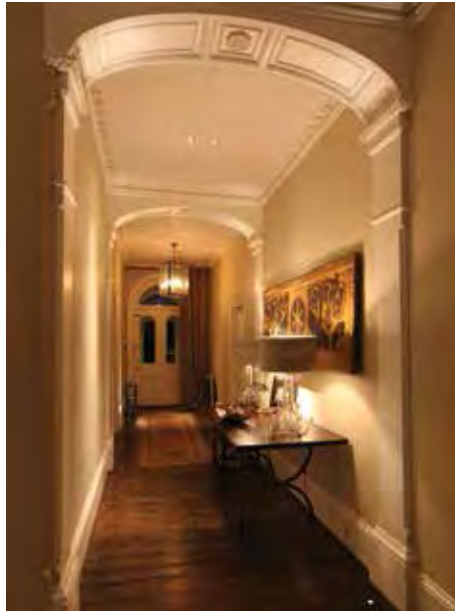

Check the website for dates of masterclasses and CPDs, although we can arrange the latter to suit. Or just drop into the showroom where our experts are on hand to help you.

INSPIRATION FOR HALLS & STAIRS

Halls and staircases can be narrow and dull, yet they create the first impression and set the tone for a house. Create impact by over-scaling a decorative pendant and dimming this for mood and add layered lighting effects to add drama to the space. Staircases can be interesting architectural features and a well-lit staircase can be regarded as a sculpture within the house.

INSPIRATION

INSPIRATION FOR RECEPTION ROOMS

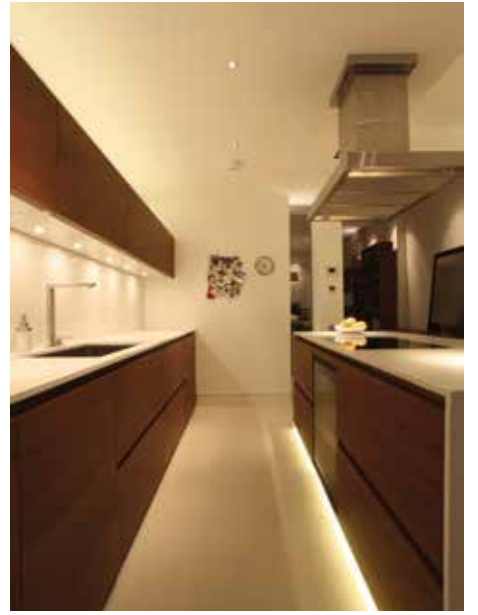

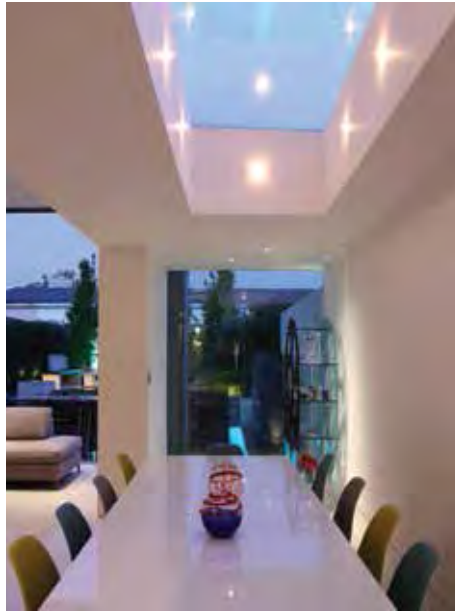

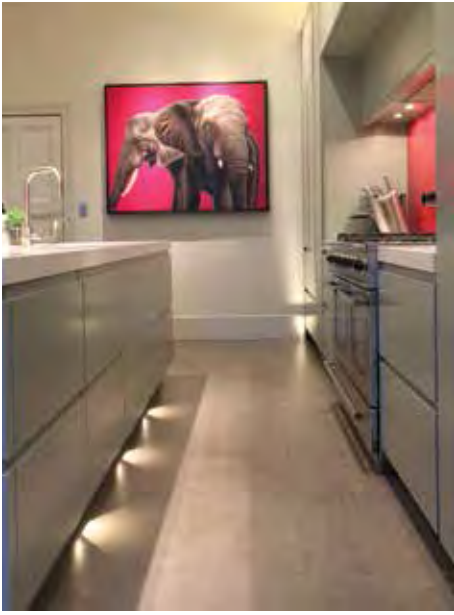

Before you make decisions on lighting, work out exactly where your furniture will be positioned and what focal points you want to highlight. Paintings, furniture, sculpture or other works of art can each be accentuated. Consider integrating lighting into your shelving to highlight books or objects and think about lighting the table at the centre of a room as this pulls the seating together.

INSPIRATION FOR KITCHENS

The kitchen is the heart of the home. Often it is not just a kitchen but works as a multi-functional dining, living and working area. The best way to maximise these different uses throughout the day is with clever lighting and flexible control. This ensures a cohesive space that the whole family can use and enjoy.

INSPIRATION

INSPIRATION FOR BEDROOMS & BATHROOMS

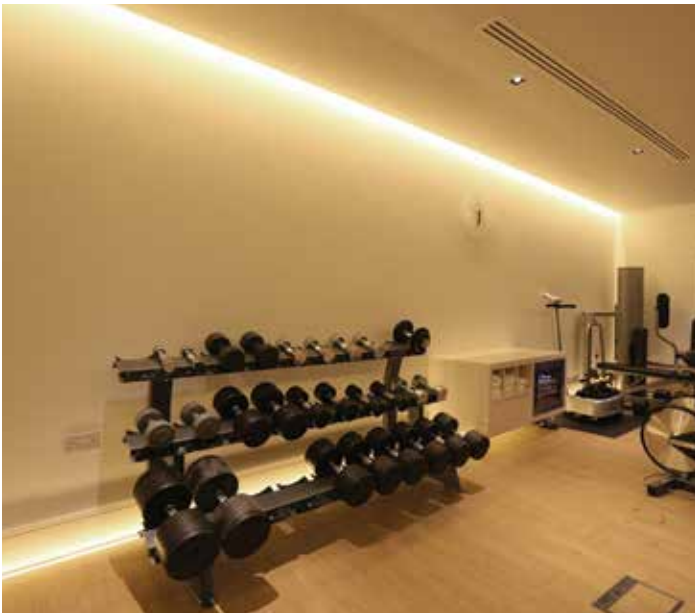

Good lighting can transform your bedroom and bathroom from a practical early morning room to an atmospheric spa to relax in at night. Enhance the material you choose with creative lighting and make even simple white tiles appear glamorous. Lighting can make a small room seem bigger or a large room feel more intimate. Layer lighting with a combination of functional shadow-free lighting around the mirror, directional downlights to highlight textures and uplights for drama and mood.

INSPIRATION FOR ENTERTAINMENT ROOMS

Be adventurous with lighting your entertainment rooms to increase your enjoyment of them. From creating a twinkly lighting effect at the bottom of a pool, incorporating a colour-changing coffer or wall wash to ensuring different moods in a gym to help you work out more effectively, use lighting to enrich both the space and your mood.

INSPIRATION

INSPIRATION FOR GARDENS

A little light goes a long way at night; it is important to decide which features to light and how intensely. Use lighting selectively, making use of both the darkness and light to enhance the best elements of your garden. The key to successful garden lighting is flexibility and using spiked fittings ensures they can be repositioned for best effect as your garden grows and the seasons change.

AN OVERVIEW OF OUR PRODUCTS

Designed in-house
Supporting British Manufacturing

To help you achieve the potential from your beautiful home, we have developed an entire range of products to create the most successful lighting scheme. We pay close attention to detail to ensure the optimum result, and use state-of-the-art technology throughout.

All our LED lights are the highest quality warm white, 2700K, and individually batched together for colour consistency, essential where you have a run of fittings. We ensure that each fitting has the maximum Lumens (light output) possible using the least amount of power (wattage) to ensure maximum efficiency, and a variety of beam widths and accessories gives you versatility with the effects that can be achieved.

All our products also have high CRI (colour rendering index) of over 90 so that you see the colours in your home as they were meant to be seen, and not altered by the light as can happen with inferior LEDs.

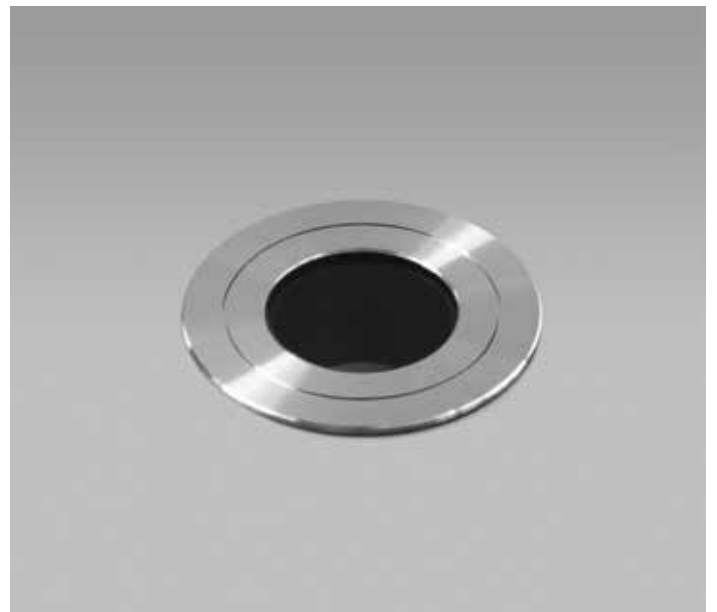

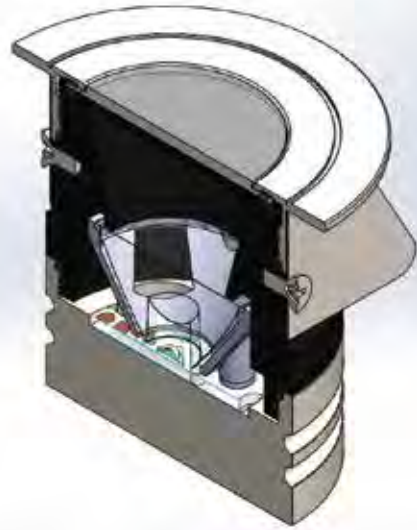

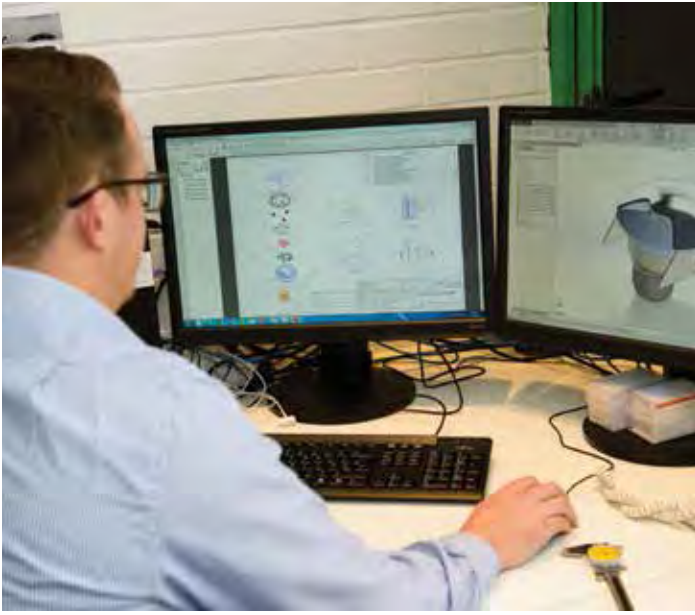

But that's not all: our fittings are discreetly sized so that you see the effect they give, rather than the products themselves.

Our in-house product designers are constantly monitoring new developments in technology to ensure that we offer the very best and most up-to-date products available, and everything is precision engineered to 0.01mm tolerance.

Manufacturing in the UK supports British industry and allows us to keep a close eye on quality control. We build great relationships with our manufacturers, which means we can ensure that our products are made to the highest standards, with close attention paid to every detail. Every single light is hand finished and quality checked to make sure it's perfect.

We have all the tools you need to create the space you desire. Be inspired by light!

PRODUCT OVERVIEW

RECESSED PRODUCTS

All our LED downlights have been designed to give you the best quality of light for your home using the latest energy efficient LEDs. They offer a warm white light of 2700K and a high CRI of 95 to ensure that the true colours of your interiors are shown. With deep baffles to reduce glare, a range of beam widths for flexibility and a number of finishes, our downlights deliver the perfect solution.

For full specification details, visit our website.

CONTROLS & DIMMERS

To maximise the effects achievable with lighting, good controls are essential. We offer a range of options across different price points to suit your needs. Please call to discuss.

ROTARY DIMMER

The simplest way to change the mood.

DOLLY/ROCKER SWITCH

Basic on/off switch for secondary areas.

MOMENTARY DIMMER

For use where multiple dimming points are needed.

SOCKETS AND DATA

A complete range of sockets and data points to match our range of switches.

TABLET AND USER INTERFACE

Wired and wireless systems incorporating tablet user interface for complete flexibility and control.

SCENE SETTING CONTROL

Easy to use single room scene setting combining circuits to create specific moods which can be recalled at the touch of a button.

OUTSTANDING SERVICE

Our friendly and knowledgeable sales team are at hand to ensure a smooth process from purchase to delivery. They will advise you accordingly – ensuring that all the correct lamps or bulbs, transformers, drivers and accessories are specified with each product. Your contractor can call up at any time for technical advice to aid correct installation of our fittings.

All products will be collated on a circuit by circuit, room by room basis for ease of installation on site, saving time and making life as easy as possible for your electrician.

We carry large stocks of our most popular products for immediate delivery from our Distribution Centre. Bespoke items often take longer but we are happy to send the rest of your order in advance.

We have a collection counter at our Customer Service Centre. If you wish to collect your items, calling us in advance will allow us to have your order ready and avoid you waiting during busy times.

“In contemplating a refurbishment of our home, we knew that that lighting was fundamental...I now realise that there is scarcely a colour scheme, nor finish, nor furniture piece, nor design that is not brought to life by the right lighting...For that single reason, it was John Cullen, after a 12 month refurbishment, that created the home we hoped for.”

Matthew Fosh, London

“You seem to have gone overboard to help us, and have so understood my style. Lighting is so complicated for us mere mortals!”

Claire Allen, Wiltshire

“The showroom is incredibly useful to visit because it is difficult to visualise the effect of lighting! However over and above that you were very courteous, polite, attentive and insightful. We will be sure to recommend you to others.”

Mr and Mrs Panikker, London
