ACO Water Management: Urban + Landscape

ACO RainDrain®

- ✓ Easy and quick to install
- ✓ Clip locking grating for secure installation
- ✓ Choice of 6 'Complete the Look' gratings
- ✓ Channel design improves flow velocity, promotes self cleansing
- ✓ Manufactured from Vienite® - ACO's high strength sustainable polymer concrete
- ✓ Full range of accessories for a professional installation
- ✓ CE marked and fully certified to Load Class A 15 BS EN 1433:2002
- ✓ Ideal for domestic and light vehicle traffic applications

ACO RainDrain®

Polymer concrete domestic drainage channel

Manufactured from Vienite®, ACO's high strength recycled polymer concrete material, the ACO RainDrain® is designed to provide surface water drainage for a range of domestic applications. Its lightweight 1m channel design makes it quick and easy to install.

The new range of elegant and modern 'Complete the Look' gratings provide choice and style to complement driveway and patio projects. A choice of 6 gratings are available:

- Wedge Wire Stainless Steel
- Antique Iron
- Polished Stainless Steel
- Anthracite
- Galvanised Steel
- Black Plastic

ACO RainDrain® has a full set of accessories available to provide a wide variety of quick and professional installations.

Typical applications

- ▶ Driveways
- ▶ Patios
- ▶ Paths

ACO RainDrain®

System Overview

Pedestrian, cycleways, minimally trafficked areas (light domestic vehicles only)*.

Features

Improved performance, system CE marked and fully certified to Load Class A 15 BS EN 1433:2002

Choice of 'Complete the Look' gratings suitable for domestic applications

Sealant groove for simple watertight installation

Knock-out for connection to Ø110mm PVC-U pipe

Channels interlock for easy and simple on-site fabrication

Clip locking grating for secure and simple installation

Lightweight design for easy handling and installation

Channel shape anchors product into concrete surround

Manufactured from recycled materials and is recyclable

Profile improves speed of water and promotes self cleansing

*A 15 products are tested to a loading of 1.5 tonnes. No A 15 products are suitable for trafficking by heavy domestic vehicles such as 4x4s or SUVs.

ACO RAINDRAIN INSTALLATION

Dig trench 318mm wide (218mm wide if against a structure) by 200mm deep for channel (400mm deep for sump). Mark finishing height with fixed line 3mm below final surface. Lay 100mm (min.) bed of concrete.

Knock out pre-formed outlet from the inside (marked with hammer symbol) or fit sump or outlet endcap. Position sump or outlet channel on concrete bed, fit PVC-U union/trap to drainage pipework.

Lay channels starting from outlet/sump, ensuring joints connect by lowering units horizontally. Fit endcap to end channel. For fully watertight joints, use a suitable sealant (contact ACO for further advice).

With gratings fitted, haunch around channels/sumps with concrete (suitable fill material). Final surface to be 3mm above grating. Bricks/paviours should be laid in mortar for lateral stability.

COMPLETE THE LOOK

Try our selector to see how your patio or driveway might look with our new grating range.
